

Notification of Exploring Together Programs

In order to ensure we can provide an excellent service to professionals trained to run Exploring Together, we have a database of all Exploring Together Programs run throughout Australia. To maintain our records, we request Program leaders to notify us of programs that they are running. Our database enables us to establish a nationwide network of Exploring Together leaders, and facilitates communication about training updates, program modifications, manual revisions, Exploring Together Programs that have been developed for different populations, and the ongoing evaluation of the program. Occasionally, too, we hear about families who wish to be referred to a Program in their area. If you are looking for outside referrals and notify us about your Program early in the planning stages, we may be able to link you up with potential referrals.

Please complete the following information about your Exploring Together Program for each leader.

Leader information

	Leader 1	Leader 2	Leader 3	Leader 4

ETP Program you were trained in (preschool, primary, adolescent)				
date and location of training				

Program information

Age range of children in program

Setting (eg school, community hall, CAMHS).....

Number of families at commencement of program

Post group

We are interested in your feedback after you have run the Program. We are also interested in hearing about the feedback the families provided to you about their experiences in the Program. Please use the space on the following page to tell us of the things that worked well in your Program, and ways in which you felt the Program could have been improved.
