

## Registration of Newly Trained Leaders

In order to ensure we can provide an excellent service to professionals trained to run Exploring Together, we maintain a database of leaders' details. Our database enables us to establish a nationwide network of Exploring Together leaders, and facilitates communication about training updates, program modifications, manual revisions, Exploring Together Programs that have been developed for different populations, and the ongoing evaluation of the program. Occasionally, too, we hear about families who wish to be referred to a Program in their area.

### Leaders Trained by Co-running an Exploring Together Program
